

The Swan's Land Project

What is Swan's Land Linen? Is it a fancy ladies' clothing store? Not exactly; at least, not yet. Swan's Land Linen is not a store or business, but a mechanism, by which high frequency original creations are exchanged for XRP, for the purpose of building the Swan's Land Community of Friends. The garments are designed, sewn, and hand-embroidered with living scroll symbols, by the woman Kathryn Arms, a hybrid Scroll bearer. These sacred offerings are one-of-a-kind, embroidered and sewn by hand to specific measurements, of the highest quality textiles, in the couture fashion. In the beginning stages, at least, these garments will be extremely limited, high value, original art in the form of tailored ladies' wear.

Swan's Land Linen is a sacred mission of Scroll 17, giver of truth and beauty. Every detail about this project is a gift from the Prime Creator Source as shared through Kathryn's oversoul. More than just clothes, each piece is original artwork infused with energies that activate gifts and abilities in others. Kathryn doesn't know all of the details yet, but takes daily steps in faith. The Planting Seeds Collection represents the beginning of the entire Swan's Land project. All XRP received will benefit Swan's Land Community of Friends, beginning with acquisition of the land. In a few years, Swan's Land Linen will have a physical presence in the community, and wider scope of offerings.

Why Linen? Linen is a fabric made from flax fibers. It is known to be strong, soft, highly absorbent, antimicrobial, and heat-dissipating. With useful and ecologically friendly properties, it is no wonder that linen has been used for about 30,000 years. Linen carries the high frequency of 5000Hz, making it naturally healing for human bodies. Compare this to polyester, for example, which resonates at the same frequency as a dying human, 0-15Hz. At Swan's Land Linen, we choose life! Linen can be worn all year long, all around the world. It is a gold standard for garments.

Why XRP? While many Americans are nervous about digital currency, the present fiat money system we call US Dollars has been digital since 1933, and you are most likely already consciously choosing digital transactions, as you shop online or use payment cards. Use discernment when choosing how to transact, and who with. Currency means circulation as a means of exchange. Trust your intuition.

There is an emerging financial system, which is regulated by the ISO 20022 Standard. Certain tokens are considered to be high frequency exchange mechanisms, including XRP, XLM, XDC, QNT, IOTA, and HBAR. The transfer of high frequency energies through the use of the ISO 20022 tokens is connected to the highest timelines and the organic earth, rather than to the old debt system. XRP is the gold standard for cryptocurrency. Carrying the frequency of gold light, it is used for cross-border settlements, land acquisition, and high value art and legacy transactions. Swan's Land Linen will accept XRP through direct cold wallet exchange, helping to facilitate a new decentralized economy. If it resonates with you, more information on Edenic communities and the decentralized economy can be found at therealityshifters.com

Who is Kryhmyll'el? The woman known as Kathryn Arms (Ylidan'ma Kryhmyll'el) has an ancient, hybrid soul. As one of the 144,000, she has certain DNA coding that are of service to Earth and its people. Her work as Ylidan'ma, Scroll 11, the Lion, anchors love and wisdom into the organic earth grid; her work as Kryhmyll'el, Scroll 17, the Swan, anchors truth and beauty. Scroll 17 energy is particularly important during the Earth's current energetic shift. Swan's Land Linen creations feature hand embroidered scroll symbols and Scroll 17 "truth and beauty" energy that is unique to Kryhmyll'el.

What is Swan's Land Community of Friends? Kathryn has been tasked by Source to build a high frequency community in the mountains of Virginia. Rememberers will live and work there, providing services and positive energy to surrounding communities and the world. This area was chosen by Kathryn's oversoul because of the ley line, mineral springs, and Kathryn's ancestral connection to the area. The dark history of colonization, slavery, false churches, and false education will be healed in the Rememberer's light and Kathryn's natural grid repairing ability.

While the details are revealed to Kathryn a little at a time, here is what can be shared now. Kathryn has received the message that the land will be acquired in 2026 with XRP. She doesn't understand how this will happen, but is trusting the process. Kathryn has been given Swan's Land Linen as a means to receive XRP from those who want to help bring Swan's Land Community of Friends into reality. In return, the client-donor of a high value offering will receive a unique creation containing Kryhmyll'el's unique high frequency energies, that can be found nowhere else. All XRP received via Swan's Land Linen will be used to acquire the land and develop the community. These offerings will be very limited, and made to fit certain measurements, as Kathryn is guided. She knows the right client will appear for each special creation, in right divine timing. If the garments are not for you, but you resonate with the project, a way will be provided for you to donate. The high frequency XLM tokens are associated with goods and services, so donations of XLM will also be accepted.

Kathryn remembers she is a Resonance Architect. After securing the land, the building of her own home and workshop will be the first priority. She must move alone to Virginia, live on her land, and transmute an enormous amount of density. She has been told she will be doing much initial planning, land clearing, and construction, all alone, for at least a year. Once the foundations for Swan's Land Community of Friends are laid, Rememberers will come to visit, live, and share their particular gifts. Kathryn's home will be her base of operations, and a place for other system builders to meet. The plan is lofty, but she is trusting the process.

The land will be between 50-100 acres, set among the mountains, and have vineyards and fruit trees. Kathryn will bring into existence her own home and workshop, paths, restaurants, gardens, healing centers, and shops, at times collaborating with others. Then, Swan's Land Linen can transform to a physical store with broader offerings. Swan's Land Community of Friends will be open to visitors from around the world.
